The Architect of this, the Peabody Museum of Natural History, are Day & Klau'der of Philadelphia. The late Frank Niles Day, had much to do with the earliest studies in that Office and he had a keen interest in the artistic success of the project. Subsequent to his death in June, 1908, the drawings were completed and the Architect's service rendered under the guidance of the only surviving member of the firm, Charles L. Klau'der.
